PROFILE SUMMARY

Results-driven Full-Stack Engineer with 12+ years of overall software development experience, including 7+ years of hands-on expertise in Angular. Strong experience in designing, developing, and maintaining enterprise web applications using **Angular, TypeScript, JavaScript, HTML5, CSS3, .NET, C#, ASP.NET Web API, REST APIs, SQL Server, Azure, Git, and Agile/Scrum methodologies**. Experienced in AI-assisted development using **Claude, GitHub Copilot, Model Context Protocol (MCP), and Spec-Driven Development (SDD)** to build production-grade AI-powered applications. Proven track record of modernizing legacy systems, improving application performance, leading cross-functional teams, and delivering scalable, high-quality solutions across **banking, fintech, e-commerce, and education** domains.

CORE COMPETENCIES

- Angular 1–18 (Primary)
- NgRx / State Management
- TypeScript, PineScript & RxJS
- Agile / Scrum / TDD
- C# / ASP.NET / Web API
- .NET Core / Azure / Docker
- SQL Server
- Git / GitHub / Jenkins / TFS
- Claude AI Full-Stack Dev
- MCP Server Integration
- Spec-Driven Development
- Kubernetes / CI-CD Pipelines

TECHNICAL SKILLS

PRIMARY	Angular 1–18, TypeScript, NgRx/Store, RxJS, HTML5, CSS3
SECONDARY	C#, ASP.NET MVC, Web API 2.0, .NET Core, EF6, MSSQL, Azure, Docker, Kubernetes
AI	Claude AI (Full-Stack), MCP Integration, GitHub Copilot, Spec-Driven Development (SDD)
DEVOPS	Git, GitHub, TFS, SVN, Jenkins, Tortoise Git, VS Code, Sonar
SCRIPTING	PowerShell, Pine-Script, Node.js, JavaScript

AI-AUGMENTED DEVELOPMENT (2025–PRESENT)

Recent upskilling & hands-on experience in next-generation development practices:

- **Claude Full-Stack Developer:**
  Designing and building end-to-end applications using Claude AI as a co-developer — from architecture design through code generation, review, and deployment automation.
- **MCP (Model Context Protocol) Integration:**
  Integrating MCP servers into development workflows to connect Claude with external tools, databases, and APIs — enabling context-aware AI assistance across the full development lifecycle.
- **Spec-Driven Development (SDD):**
  Implementing SDD methodology — writing detailed machine-readable specifications first, then using AI tools (Claude + GitHub+ **Playwright**) to auto-generate, validate, and iterate on production-quality code that adheres to the spec contract.
- **GitHub AI Workflows:**

Leveraging GitHub Copilot, GitHub Actions, and Claude integrations for automated PR reviews, code suggestions, and intelligent CI/CD pipelines.

EMPLOYMENT HISTORY

Sr. Technical Specialist | Synechron Pvt Ltd, Bengaluru

June 2022 – Present

- Lead front-end architecture for large-scale fixed-income banking application for a top-tier investment bank.
- Migrated legacy Angular JS (controllers, view models) to Angular 13–18 with TypeScript and NgRx.
- Architected account details, price details, and client buy-allocation components using Angular, HTML5, CSS3.
- Applying SDD practices and Claude AI to accelerate sprint delivery and reduce defect rates.
- Integrated MCP servers to streamline developer tooling and automate repetitive workflows.
- Debugging and reviewing AI-generated code while leading architectural decisions to build scalable and maintainable project solutions

Tech-Lead | Harman Connected Services (India) Pvt Ltd

July 2016 – May 2022

- Led teams of 4–12 across IoT (Device Management) and security domain (AlarmNet360) projects.
- Built Device Management app for Landis+Gyr: Angular 12+, NgRx/Redux, communicating with HES servers.
- Delivered ESM for Honeywell: C#, Angular 4, Node.js, Azure, .NET Core, Docker, Kubernetes.
- Travelled to Finland for client requirement-gathering; received formal recognition for on-time delivery.

Consultant | Capgemini India Pvt Ltd

October 2014 – July 2016

- Full-stack development for Coca-Cola US — TUIDD (Teradata migration) and ECMA projects.
- Built ECMA module from scratch: Angular JS, Indexed DB, Bootstrap, UnderscoreJS, lo-dash.

Senior Software Engineer | Adeptpros IT Solutions Pvt Ltd

January 2014 – August 2014

- Education product development for Houghton Mifflin Harcourt (US) client.

Software Engineer | Nexus Technoware Solution Pvt Ltd

January 2012 – January 2014

- Developed and maintained vendor-based web applications; led in-house web product development.

KEY PROJECTS

1. RAA (Reasonable Alternative Analysis)
Client: Large Investment Bank
Role: Sr. Technical Specialist

Tech Stack:
Angular 16+, Spring Boot, ZooKeeper, Annuity Pro, Alts OE

Developed RAA, a regulatory compliance platform enabling financial advisors to create, manage, and attest Reasonable Alternative Analysis (RAA) orders with automated workflows, role-based access, and full audit trails. Integrated with multiple order-entry systems (Annuity Pro, Alts OE, DAT, etc.) to enforce compliance checks, with dynamic ZooKeeper-driven configuration and Sentinel OIDC authentication.

2. Fixed Income Ticket (FI Ticket)
Client: Large Investment Bank
Role: Sr. Technical Specialist

Tech Stack:
Angular 16+, TypeScript, NgRx/Store, Node.js, Web API 2.0

Financial analyst platform for placing Buy, Sell, Bid Wanted, and Bid Cross trade orders. Successfully migrated legacy ASP.NET MVC & Angular JS codebase to Angular 13+, Web API 2.0. Architected account details, price details, and client buy-allocation components. Applied SDD and Claude AI tooling to accelerate feature delivery.

3. Device Management (DM)

Client: Landis+Gyr
Role: Sr. Technical Consultant

Tech Stack:
Angular 12+, TypeScript, NgRx/Store, Redux

Web-based application for managing configuration and scheduling of Grid Stream metering devices. Led the presentation-layer architecture, enabling secure communication with Head End System (HES) servers. Team size: 10.

4. ESM (Infrastructure Management)

Client: Honeywell
Role: Technical Consultant

Tech Stack:
C#, SQLite, Angular 4, Node.js, TypeScript, WCF, Web API, Azure, .NET Core, Kubernetes, Docker

Tool for deploying and managing infrastructure with simplified UI for complex agent-based workflows. Provided real-time deployment status and enhanced agent performance visibility. Team size: 4.

5. AlarmNet 360

Client: Honeywell
Role: Full-Stack Developer

Tech Stack:
MVC3, SQL Server 2012, Angular 1/2, TypeScript, SignalR, WCF, Enterprise Library 6.0, Azure, Kubernetes

Next-generation security panel management platform enabling account creation, communicator registration, and remote service activation across desktop and mobile. Resolved bottlenecks, developed new features. Team size: 12.

6. TUIDD & ECMA

Client: Coca-Cola (TCCC)
Role: Full-Stack Developer

Tech Stack:
Angular JS, jQuery, HTML5, CSS3, Bootstrap, Teradata, MVC4, Entity Framework, Indexed DB

Migrated 212 CBS UI screens to TUIDD platform and built ECMA module from scratch for promotions and outlet management. Enabled CBS analysts to maintain product/store data feeding Wall Street sales reports. Team size: 6.

CERTIFICATIONS

MCP
Microsoft Certified Professional

AIF-C01
AWS Certified AI Practitioner

AZ-900
Microsoft Azure Fundamentals

EDUCATION

M.Sc. (IT) 2012 — Kuvempu University
B.Sc. (IT) 2009 — Kuvempu University

GNIIT 2010 — NIIT
XII Science 2006 — CHSE

KEY ACCOMPLISHMENTS

- Received PROJECT STAR award for multiple initiatives driving financial and functional project growth.
- Travelled to Finland multiple times for client requirement gathering; commended for on-schedule delivery.
- Automated manual processes significantly, improving accuracy and reducing operational overhead.
- Fine-tuned business processes leading to measurable improvements in system performance and stability.
- Pioneered adoption of Claude AI and MCP tooling within the team, elevating overall sprint velocity.
